MIZUNO CREW 21

MIZUNO GLOBAL SUSTAINABILITY

MIZUNO CREW 21 wurde im September 1991 ins Leben gerufen, als globales Nachhaltigkeitsprogramm zum Schutz des Planeten für alle künftigen Generationen. Mizuno hat damals schon erkannt, dass alle unternehmerischen Aktivitäten Auswirkungen auf die Umwelt haben, und so konzentriert sich das Unternehmen jeden Tag darauf, zum Erhalt unseres schönen Planeten beizutragen.

Seit April 2021 werden nun alle globalen Mizuno Nachhaltigkeitsaktivitäten unter dem Dach von „**MIZUNO CREW 21**“ vereint.

Soziale, wirtschaftliche und ökologische Nachhaltigkeit sind uns wichtig. Durch immer neue Innovationen und die ständige Weiterentwicklung unserer Produkte und Dienstleistungen bemühen wir uns um eine Zukunft, in der Sport zu physischer und psychischer Gesundheit der Menschen beiträgt.

VISION

Wir glauben an eine nachhaltige Zukunft, in der alle Menschen gleichermaßen auf einem sicheren und gesunden Planeten leben. Unter Wahrung der Würde aller Menschen werden wir uns weiterhin für eine positive Zukunft einsetzen, in der Sport jederzeit, überall und ohne Vorbehalte ausgeübt werden kann.

MISSION

Wir wollen unseren Planeten Erde schützen; die Bühne, auf der wir Sport treiben. Durch innovative Produkte und Dienstleistungen, neueste wissenschaftliche Erkenntnisse und inspiriert von der Natur, bemühen wir uns, um eine gesunde und nachhaltige Zukunft.

UMWELT

Wir setzen uns für eine nachhaltige Gesellschaft ein, indem wir aktiv die Erhaltung der globalen Umwelt vorantreiben. Jeder Einzelne von Mizuno und in allen Geschäftsbereichen.

Da wir Produkte und Dienstleistungen anbieten, die die vielfältigen Werte des Sports verkörpern, ist der Schutz der Umwelt und der Menschen ein wichtiges Thema.

GESUNDHEIT

Wir glauben an die kollektive Kraft, die der Sport für die Gesellschaft hat. Sport hat nicht nur die Fähigkeit, die körperliche und geistige Gesundheit der Menschen zu erhalten, sondern fördert auch die Kommunikation über Länder und Generationen hinweg. Mizuno unterstützt die Menschen bei der Ausübung ihres Sports und trägt dadurch zu einer besseren und nachhaltigeren Gesellschaft bei.

MENSCHLICHKEIT

Vereint in der Achtung der Vielfalt und der Toleranz für alle Menschen, glauben wir an eine gleichberechtigte und friedvolle Welt. Mizuno respektiert die Vielfalt aller Menschen und hat sich zum Ziel gesetzt, jeden Sportler und jede Sportlerin bestmöglich zu unterstützen, unabhängig von Nationalität, Rasse, Geschlecht, Alter oder körperlichen Fähigkeiten.

SUPERIOR TRAINERS

Elevate your training with these shoes developed for runners seeking high-performance super trainers. Enjoy effortless runs with the Smooth Speed Assist technology, specially developed for racing shoes, which helps runners achieve a better and more efficient running form. The NITROGEN INFUSED MIZUNO ENERGY NXT in the top midsole enhances the cushioning and energy return, while EVA-based MIZUNO ENERGY NXT in the bottom midsole provides stability.

BENEFITS

- MIZUNO ENERGY NXT (Nitrogen Infused) in the top midsole provides soft cushioning and high energy output. Furthermore, the EVA-based MIZUNO ENERGY NXT bottom midsole adds stability.
- Smooth Speed Assist: Helps achieve a more efficient running form during regular runs and training.
- MIZUNO WAVE: In addition to providing both cushioning and stability, the WAVE PLATE supports forward propulsion and a smooth weight transfer.

SUSTAINABILITY

MATERIALS

70% of the upper textile is made from recycled content. 90% of the shoelace is made from recycled content. 90% of the sockliner lining is made

from recycled content. Part of the midsole is made with a sugarcane-based material. BLOOM™ included in the outsole. The upper body textile is undyed to reduce water consumption.

OUTSOLE

TECHNOLOGIES

WAVE SKY 9

GLIDE THROUGH THE SKY

This shoe was crafted and enhanced for runners who love a cushioned running experience that almost feels like floating. The top midsole is now made from MIZUNO ENERGY NEXT (Nitrogen infused) for even better cushioning and energy return. Together with the MIZUNO ENERGY NXT (EVA base) bottom midsole the result is a plush and stable max-cushioned shoe.

BENEFITS

- MIZUNO ENERGY NXT: Nitrogen infused in the top midsole and the EVA-based version in the bottom midsole provides the perfect balance between cushioning and stability.
- MIZUNO WAVE (Foam wave): Enhances stability and provides cushioning.
- Smooth Stretch Woven: Offers a comfortable and secure fit around the foot.

WAVE RIDER 29

RIDE THE NEXT WAVE

This shoe is an excellent choice for everyone from beginners to marathon runners who like moderate cushioning. The incorporation of MIZUNO ENERGY NXT (Nitrogen infused) takes the cushioning and energy output to the next level. It helps you smoothly transition from ground contact to toe off. The MIZUNO WAVE structure works in concert to support forward propulsion and a smooth weight transfer.

BENEFITS

- MIZUNO ENERGY NXT (Nitrogen infused) is used in the top and bottom of the midsole for cushioning and a high energy output.
- MIZUNO WAVE: In addition to providing both cushioning and stability, the WAVE PLATE supports forward propulsion and a smooth weight transfer.

MIZUNO α II ELITE

ENGINEERED FOR ELITE SPEED

This football boot was meticulously crafted for players seeking maximum speed and comfort with a lightweight, barefoot feel. Redesigned from the ground up, the upper offers a superior fit with innovative material choices and a new pattern. The external counter AG sole ensures exceptional grip on artificial grass. The ZEROGLIDE α MESH insole further enhances stability, reducing lateral shifts for precise, fast movements on the field.

BENEFITS

- Upper - All material choices were reviewed from scratch to achieve a more comfortable fit. The upper pattern was also redesigned to improve the fit.
- Sole - The external counter AG sole provides optimal grip on artificial grass.
- Insole - The grip of the ZEROGLIDE α MESH reduces lateral shifts and supports precise movements.

MORELIA NEO IV B ELITE

BAREFOOT COMFORT PLUS EXCELLENT PERFORMANCE

Experience the ultimate lightweight performance with this 4th generation MORELIA NEO model, designed for a flexible barefoot feel. This boot features BareFoot KNIT NEO for a more barefoot feel around the boot opening plus BareFoot MESH NEO soft material at the midfoot. The new eyelet arrangement conforms to the foot while minimizing creasing, and the external counter AG sole provides excellent grip on artificial grass.

BENEFITS

- Authentic K-Leather
- BareFoot KNIT NEO (updated with a knit pattern that aims for even more of a barefoot feel around the boot opening)
- BareFoot MESH NEO (softer material was adopted for the upper midfoot mesh in pursuit of even more of a barefoot feel)
- New laces eyelet structure (redesigned eyelet arrangement minimizes creasing when flexing and conforms better to the foot)
- The external counter AG sole provides optimal grip on artificial grass.
- Suede material was used for the insole outer material for a good sense of grip

WAVE LIGHTNING Z8

ICONIC PERFORMANCE

Play at the top of your game with this comfortable shoe packed with features customized for volleyball. Enjoy soft cushioning and high energy return with the MIZUNO ENERGY NEXT and SOCKLINER at the forefoot, plus the MIZUNO ENERGY midsole. You'll jump faster and higher than ever with the support from the new MIZUNO WAVE plus the rounded heel structure. All these features come at a remarkably light weight thanks to the monofilament mesh.

BENEFITS

- MIZUNO ENERGY NXT/SOCKLINER at the forefoot provide soft cushioning and high energy return.
- MIZUNO WAVE structure developed to provide maximum support for jumping. The PLATE is extended to provide maximum support for stability and energy return when jumping.
- Dyna-Eyelet Wrap structure with large cut-outs offers a fit that feels like it wraps the entire foot.
- Monofilament mesh to achieve a light weight and a better breathability, strengthened by the transparent mesh.
- Rounded heel structure to support jumping motions and to improve stability when taking steps.

WAVE ENFORCE TOUR 2

MATCH-WINNING STROKES

Achieve victory with this shoe engineered to keep your strokes strong until the final match point. Reducing this shoe's weight by about five grams from the previous model, the MIZUNO ENERGY NXT technology provides cushioning and energy return essential for playing strongly to the very end. The shoe also features the updated Dyna-Heel Lock lite for improved lightness, fit, and stability, and the adoption of a flat sole and outrigger to support rotational movement.

BENEFITS

- Updated shoe structure to Dyna-Heel Lock lite for lighter, easier access
- Improved ankle-to-heel fit and stability for baseliners' lateral movement
- MIZUNO ENERGY NXT at heel and ball for high energy return and shock absorption
- Flat sole with outrigger supports rotational movement
- Rubber wrapping at ball of foot enhances durability for baseliners

UVP	€ 160,00

USP

The WAVE ENFORCE TOUR is a stability model that focuses on hitting, helping players continuously maintain strong strokes. Lightweight feel (meaning it is not too heavy, weighing about 375g).

TARGET CONSUMER

For serious level (advanced level) baseliners. For players who do not hit strokes in a light motion, but rather hit strokes with their feet firmly planted on the ground. For players who play aggressively with powerful strokes.

WAVE ENFORCE COURT

COMMAND THE COURT

Take control of the court with this cushioned shoe offering amazing features at a great price. The MIZUNO ENERGY and Foam Wave combination provides excellent cushioning, energy return, and comfort. The flat sole and outrigger enhance stability during play, while the X10 rubber outsole offers excellent durability. This shoe is inspired by WAVE ENFORCE TOUR for both its features and design, but is offered at a much more affordable price.

BENEFITS

- MIZUNO ENERGY x Foam Wave: The high cushioning and energy return of MIZUNO ENERGY and Foam Wave provide enhanced comfort when wearing the shoe.
- Flat sole x Outrigger: The wide area that makes contact with the ground enables more stability underfoot.
- X10 rubber: Outsole material with amazing durability.
- Design linked to ENFORCE TOUR: This model is the twin spirit of ENFORCE TOUR, sharing its rope-like design for the sole and upper.

STEP IT UP

Advanced players can count on this speed-boosting shoe to outpace the competition. It combines a light weight with features that will enhance your starting motions, ease of movement, and turns. These include the MIZUNO ENERGY NXT and MIZUNO ENERGY INSOLE at the ball of the foot for quick starts and turns, plus the updated WAVE PLATE that converts your power into speed.

BENEFITS

- MIZUNO ENERGY NXT and ENERGY INSOLE support quick turns and agility.
- Updated WAVE PLATE offers rigid feel, power conversion, and smoother movements.
- Dyna-Eyelet Wrap provides a snug fit that adapts to foot motion.
- 3D-SOLID design maintains softness while incorporating enhancements.

WAVE EXCEED COURT

ALL-AROUND AMAZING

Active tennis players can count on this shoe for amazing comfort and agility at a low weight. It was crafted to enhance changes in direction and swift movements during play through incorporation of MIZUNO ENERGY in the forefoot plus a MIZUNO ENERGY INSOLE. It also uses the same sole design as Mizuno's top model. The two-color mesh and RB logo provide a fresh look that conveys speed.

BENEFITS

- By adopting MIZUNO ENERGY in the forefoot area and MIZUNO ENERGY INSOLE, this model provides the necessary support for „quick changes of direction and swift movements“ required for a speed model.
- With the incorporation of a new two-color mesh and the RB logo, it achieves a sense of speed and freshness.
- The use of new mesh material in the inner vamp creates a simple yet luxurious look.

BREAK SHOT 5

BREAK INTO TENNIS

You'll be serving up success in no time with this beginner-friendly shoe designed to boost performance. It offers a combination of features that help elevate, including a flat sole, high flexibility, relaxed feel, and light weight. The highlyflexible, flat sole design bends easily and helps you get a feel for the court. This model has been given a more relaxed feel and reduced in weight by about 15 grams compared to the previous model.

BENEFITS

- More relaxed last than the previous model, providing comfort that easily matches the feet of a wide range of players.
- Highly flexible sole design that is beginner-friendly and bends easily even for players who are still developing their physical strength.
- Extremely stable flat sole that helps players get a feel for the court through the entire foot.
- Removable cup insole that follows the shape of the foot.

IDEAL STABILITY

This shoe is an especially excellent option for players seeking stability. The design of the flex grooves is perfect for players who tend to use their toes to grip the ground, extending their range of motion and supporting more dynamic footwork. The heel was also enhanced for better stability, and MIZUNO ENERGY NXT was added to increase the cushioning.

BENEFITS

- Stability for every movement. Hit the ball with the ideal form.
- The design of the flex grooves allows players to use their toes to grip the ground.
- Heel part designed to improve heel stability. Improved heel fit to support stability when stepping down.
- Equipped with MIZUNO ENERGY NXT for greater cushioning.

ULTIMATE PERFORMANCE

Top players will achieve their best performance ever with this shoe that supports them from the ground up. It provides unprecedented enhancements like the new Stepillar sole structure for side cushioning, a feature not offered by any other company. The FOAM WAVE structure also offers shock-absorbing cushioning and softness, while the Dyna-Heel lock provides stability with an improve fit.

BENEFITS

- Stepillar: Adding Stepillar to the outsole surface enhances the side cushioning and eases the burden on the foot when making dynamic steps.
- FOAM WAVE: The structure combining wavy foam materials of different hardness provides both cushioning and stability while aiming for softer contact with the ground.
- Dyna-Heel Lock: Improves the fit from ankle to heel as well as stability during movement at a high competitive level.

WAVE CLAW 3

THE BEST JUST GOT BETTER

This updated WAVE CLAW model offers all-around improvement to already-excellent features. Although 10 grams lighter than the previous model, it is softer and more comfortable due to tweaks to the shoe opening spongy area, the new Dyna-Eyelet Wrap structure that envelops the foot, and cushioning that supports lunges. The shoe also offers enhanced functionality with the all-new MIZUNO ENERGY NXT for amazing cushioning and energy return.

BENEFITS

- Lighter - This shoe is about 10 grams lighter than the previous WAVE CLAW 2 model.
- Softer - This shoe achieves a more comfortable fit through review of the position and thickness of the sponge around the shoe opening. It offers support for playing comfortably and stress-free until the end of the game.
- More functional - The forefoot is equipped with the new functional material MIZUNO ENERGY NXT. The shoe provides soft cushioning and high energy return.
- An even better fit - The newly functional Dyna-Eyelet Wrap, an eyelet structure with large cut-outs, provides a fit that feels like it wraps the entire foot.

WAVE FANG 2

STABLE POWER

Get the power and stability you've always wanted in this shoe with all-new enhanced features. The flat sole design offers better stability than ever before, with an outrigger for quicker turns. Using Mizuno's signature Foam Wave instead of a Wave Plate provides excellent softness. MIZUNO ENERGY CORE at the forefoot also offers amazing cushioning and energy return.

BENEFITS

- Flat sole with enhanced stability - Achieves the amazing stability of the Fang series by adopting a flat sole.
- An outrigger is also equipped on the side of the little toe at the forefoot, supporting stability during quick turns.
- Smoother lunging motions - Smoother lunging motions are supported through the design with a protruding heel area.
- Excellent cushioning and energy return - Excellent cushioning is achieved through the placement of the protruding heel structure and the thicker midsole.
- Plus, leveraging Foam Wave instead of the Wave Plate used to date provides enhanced softness, and loading MIZUNO ENERGY CORE at the forefoot achieves enhanced cushioning and energy return. This helps players make smoother lunges and smoother return motions post-lunge.

TECHNICAL GLOSSARY

TECHNICAL GLOSSARY

WAVE TECHNOLOGY

	Parallel Wave Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.		Fan-shaped Wave Wave technology which features various Wave heights, delivering excellent cushioning and stability.
	Infinity Wave Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.		Double Fan-shaped Wave Wave technology that gives the highest levels of support combined with excellent cushioning.

ALL SPORTS

	Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape absorbs and disperses the impact at foot strike, which results in a smoother, more cushioned feel on every step.		ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.
	The DynamotionFit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.	AIRmesh	Breathable and cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.
	Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.	Removable INSOCK	Removable insock for comfort and cushioning.
SR touch	An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.	Premium INSOCK	A high-grade removable insock for comfort and cushioning.
MIZUNO COB	MIZUNO COB (center of balance) is a midsole structure with multiple pods that activate body awareness to increase balance.		Provides a well cushioned landing with amazing energy return. This midsole material surpasses all expectations of comfort set by previous materials.
	Redefine what Energy return should feel like with this super soft and bouncy midsole material created by Mizuno for our top line products.		

TECHNICAL GLOSSARY

RUNNING TECHNOLOGIES

AeroHug	The new MIZUNO upper technology holds the foot stable during the run for a secure fit and an unrivalled comfort. A soft fabric mesh stretches and wraps around the foot to create the most comfortable ride.		Pebax® Powered Wave Plate for lightweight energy return
X10	Durability and Traction. X-10 is an extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and gives more traction at the heel strike.		The Wave Plate is constructed with a bio-sourced Pebax Rnew® plate. This provides extremely lightweight support and energy return, empowering athletes with every step.
	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leads to trail shoes that adapt to their surroundings and work in perfect harmony with the body.		An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. It gives an energised, euphoric and super-comfortable run.
	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.	ESS Rock Plate	An extra solid sheet rock-plate in the forefoot which provides superb protection against stones and rock.
	A unique midsole compound providing high comfort and performance, while being extremely lightweight.		Waterproof, breathable fabric membrane upper technology.
	An engineered approach to minimise the rapid acceleration and deceleration of the foot during transition, creating the smoothest ride possible.	Blown Rubber	The pressure absorbing blown rubber outsole optimizes pressure distribution throughout the forefoot.
WAVEKNIT	A knit construction inspired by our Mizuno Wave technology. It's dynamic stretch and hold abilities provides a sock-like fit that feels natural every step.	XPJP	A completely new type of midsole compound that delivers cushioning, rebound and durability at a high level. The exquisite harmony of the super soft and advanced cushioning with high energy return makes you feel as if you are floating on water.
ELB	A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.	XtaGrip	An outsole construction that provides superior grip on various surfaces thanks to its adaptive abilities. Allows for high traction on soft surfaces and high friction on firm surfaces.
	Vibram's innovative lug design which solely focuses on offering superior traction.		Vibram's high performance rubber compound which offers a superior grip on dry and wet terrains.

TECHNICAL GLOSSARY

FOOTBALL & RUGBY TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		Grippy insock material that stops the foot from sliding inside the shoe.
	Upper delivers a high level of softness and durability with a structured fit.		R-Fiber mesh controls the upper stretch and securely holds the foot during acceleration and turns.
	A unique midsole compound providing superb comfort and performance, while being extremely lightweight.		Highest kangaroo leather quality for premium comfort fit and natural ball touch.
	It is a revolutionary concept, with an integrated memory foam construction which controls three key performance characteristics: Fit, Stability and Touch.		

RACKET SPORTS TECHNOLOGIES

	A unique upper providing the highest level of softness and durability, while maintaining breathability.		A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
	An exceedingly lightweight midsole material with excellent comfort and resilience properties.		Durability and Traction. X10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.
	Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.		The BOA Fit System contains three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. It is engineered to optimize fit and provide precision, adaptability, and control.

TECHNICAL GLOSSARY

INDOOR TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		An exceedingly lightweight midsole material with excellent comfort and resilience properties.
	A performance outsole component that enhances traction where needed most.		Specifically designed flex grooves in the outsole to improve stability and on court agility.
	Dura Shield protects your toes and increases the product durability.		Super soft and durable synthetic collar lining insert which adds comfort and durability when using ankle braces.
	A shock-absorbing cushioning compound.		

TECHNICAL GLOSSARY

APPAREL TECHNOLOGIES

	Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best performance.		Mizuno FreshPlus technology adds an anti-bacterial and deodorising function to your garment, creating a fresher and odour reducing product.
	Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.		Mizuno DynamotionFit technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.
	Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.		CoolTouch technology provides a soft feeling and leads to extremely quick drying.
	Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.		BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.
	Improvement in performance through key muscles being warmed to optimal level for efficient energy output.		Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.
	Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.		SolarCut technology reflects sunlight ultraviolet waves by reducing the light transmission and thus keeping the body cool.
	Saving water with pure performance. Waterless dyeing process, without added chemicals, that saves up to 25 liters of fresh water per tee shirt dyed.		Mizuno DRY AEROFLOW provides superior breathability even under sweat condition and keeps the body cooler.
